

## TECHNICAL NOTE

# **Model HI 4050 Series**

## **Update advisory notice for Firmware version 1.10.0.0 or higher**

This advisory notice concerns backwards compatibility of Firmware Version 1.10.0.0.

Firmware Versions 1.10.0.0 and up stores the instrument TCP/IP address within the SD card. This feature enables the transfer of all instrument parameters and TCP/IP information from one unit to another, ensuring easy swap out of a unit. The transfer of the TCP/IP information will work only when both instruments have been upgraded to Version 1.10.0.0 or higher.
